

Wheeled Coach FireMedic Series

™
TYPE I

TYPE I

Key Features

Aluminum Cabinets

Lightweight, customizable, durable design offers rounded corners.

Seamless Doors

Seamless, pan-formed doors with large user-friendly Max-Grip handles are now standard on all Wheeled Coach modular ambulances.

Patented P.A.F.™ System

Exchanges air in the patient compartment every 90 seconds. It also produces a greater volume of air at a lower velocity.

Printed Circuit Board

Features LED self-diagnostics, easily accessible and doesn't require factory rework.

Corner-Cap Lights

Provides 360-degree lighting coverage. Also available with optional strobe package.

FireMedic Foam Suppression System

Wheeled Coach offers a compressed air foam system (CAFS), designed for easy one-man operation and for initial fast attack response.
